<p><b>For Those Who Watch What They Eat, Consider This:</b>  <i>A recent study suggest that we've found the answer:</i>            The Japanese eat very little meat and suffer fewer heart attacks than Americans.            The Mexicans eat a lot of fat and suffer fewer heart attacks than Americans.            The Chinese drink very little red wine and suffer fewer heart attacks than Americans.            The Italians drink a lot of red wine and suffer fewer heart attacks than Americans.            The Germans drink a lot of beer &amp; eat lots of sausage &amp; suffer fewer heart attacks...            Conclusion: Eat &amp; drink what you want, apparently speaking English is what kills you!</p>					1	2
